

Hanna Boychenko

Technical Project Manager | Business Analyst | Program Manager | PMO

Warsaw, Poland | Remote | Email: hanna.boychenko@gmail.com | LinkedIn: linkedin.com/in/hannaboychenko

PROFESSIONAL SUMMARY

Technical Project Manager, Business Analyst, Program Manager, and PMO leader with 13+ years in IT, including 5+ years leading up to six concurrent projects and cross-functional teams of up to 25 people. Backed by 7 years of hands-on software engineering experience, I bridge business and engineering across Web3, AI, SaaS, and complex digital products. My scope combines delivery governance with business analysis, requirements elicitation and management, process mapping, user stories, acceptance criteria, documentation, executive reporting, presales, and release coordination.

CORE SKILLS

Primary skills: Technical Project Management, Business Analysis, Program Management, Multi-project Delivery, PMO Governance, Technical Delivery, Delivery Governance, Cross-Functional Team Leadership, Stakeholder Management, Risk Management, Dependency Management, Resource & Capacity Planning, Budget Management, Release Management, Requirements Management, Documentation Management, Roadmapping, Executive Reporting, Process Improvement, Product Discovery, Presales & RFPs, Web3 & Blockchain Delivery, AI Product Delivery, B2B SaaS Delivery.

Business analysis and documentation: Requirements Elicitation & Gathering, Stakeholder Interviews & Workshops, Requirements Analysis, Functional & Non-functional Requirements, User Stories & Use Cases, Acceptance Criteria, Process Mapping, As-is / To-be Analysis, Gap Analysis, Requirements Traceability, Change Management, Business & Functional Documentation, Technical & Process Documentation, Decision Logs, Release Documentation.

Methods and delivery models: Agile, Scrum, Kanban, Scrumban, Waterfall, T&M, Fixed-price.

Tools: Jira, Confluence, Miro, Notion, Trello, Shortcut, GitLab, Bitbucket, Figma, Draw.io, Grafana, MS Excel.

PROFESSIONAL EXPERIENCE

Confidential Web3 Infrastructure Company (NDA) - Project Manager

Feb 2025 - Present

- Coordinate three concurrent technical workstreams across a seven-person team for a non-custodial Web3 infrastructure product.
- Elicit, analyze, document, and manage business, product, and technical requirements across engineering, product, design, analytics, compliance, legal, and finance stakeholders.
- Translate stakeholder needs into functional and non-functional requirements, user stories, acceptance criteria, process flows, delivery plans, ownership maps, milestones, and release readiness criteria.
- Create and maintain project, product, process, and technical documentation, including requirements specifications, decision logs, meeting notes, change records, release documentation, and executive-level status reports.
- Coordinate engineering, product, design, analytics, compliance, legal, and finance stakeholders across complex cross-team dependencies.
- Build and maintain Grafana dashboards, charts, and visual reports for product and operational analytics, helping the team monitor trends and investigate changes in key indicators.
- Use AI-assisted development to prototype internal services and analytics utilities alongside project delivery responsibilities.
- Drive critical-path issues to resolution by clarifying decisions, escalating risks early, and following deliverables through release.

Confidential Web3 & AI Software Development Company (NDA) - Project Management Officer

Feb 2024 - Jan 2025

- Coordinated approximately six concurrent client projects across different delivery stages in a Web3 and AI software outsourcing environment.
- Managed cross-functional delivery teams of up to 25 people across multiple client engagements.
- Collected, clarified, documented, and managed requirements from client and internal stakeholders across multiple Web3 and AI engagements, maintaining traceability from discovery through delivery.
- Standardized business analysis and project documentation, including requirements, planning artifacts, status reports, meeting follow-ups, decision logs, and risk and dependency registers.
- Connected technical and business stakeholders, translated priorities into actionable plans, and surfaced delivery trade-offs early.
- Balanced scope, timelines, resources, budgets, and cross-team dependencies while maintaining visibility for leadership.

Fively - Project Management Officer | Product Manager | Presales Lead

Nov 2020 - Jan 2024

- Managed 4-5 concurrent T&M and fixed-price software projects with cross-functional teams of up to 14 people.
- Structured delivery across multiple sub-teams and managed several Project Managers responsible for individual workstreams.
- Combined PMO leadership, business analysis, product discovery, and presales responsibilities within a single cross-functional role.
- Led discovery and requirements workshops, documented business needs, functional scope, user stories, acceptance criteria, process flows, assumptions, and change requests.
- Handled planning, roadmaps, risks, resource allocation, budgets, delivery ceremonies, quality reviews, and one-on-one sessions with team members.
- Led delivery and solution planning for 90+ RFPs across multiple domains, eliciting and analyzing client requirements and translating them into documented scopes, assumptions, team structures, timelines, and delivery approaches.

TECHNICAL BACKGROUND

iTechArt - Software Developer

Nov 2017 - Oct 2020

- Developed and modernized a complex clinical-trial management platform, contributing to a new architecture, delivering new features, and extending legacy functionality.
- Delivered new product features for a US rental and roommate-matching platform.
- Contributed to the ground-up re-architecture and rebuild of a multi-brand HR-tech product suite, delivering shared functionality across industry-specific platforms and features for algorithm-driven job matching.
- Developed functionality for a German platform that automated the coordination of repair and renovation work across buildings and premises.
- Worked across .NET and JavaScript environments, including React.js and Node.js.

Andersen - Software Developer

Jul 2015 - Nov 2017

- Delivered software across four client projects spanning insurance, industrial operations, and automotive customer-experience applications.
- Redesigned application architecture, modernized existing components, and developed new functionality for an Israeli insurance platform.
- Developed functionality for an NDA-protected industrial manufacturing platform used to monitor and coordinate production processes and operational data.
- Built full-screen Windows touchscreen applications from the ground up for global automotive brands' digital showrooms, interactive displays, and café installations using WPF and WinRT.
- Led university-based programming courses that supported Andersen's developer recruitment pipeline by identifying and attracting potential hires.

Polotsk State University - Part-time Software Development Teacher

Aug 2015 - Nov 2016

- Taught software development courses with theory and lab work.
- Coordinated first-year students and supported thesis project management and quality control.

Riftek - Software Developer

May 2013 - Jun 2015

- Designed and developed a database for storing and organizing information about components used in 3D scanners.
- Built an application that enabled users to query the database and maintain records for those components.

PROJECT TYPES

Web3 Infrastructure, Blockchain & Crypto Products, AI-enabled Products, B2B SaaS Platforms, Clinical Trial Software, HR-tech & Job Matching, PropTech & Rental Marketplaces, Insurance Platforms, Automotive Showroom Applications, Industrial Data Systems. Client and product details are protected by NDA.

EDUCATION AND CERTIFICATIONS

- Google Project Management Certificate (2023-2024)
- BA Courses by MyMonday (2020)
- PM Courses by MyMonday (2020, 2022)
- UX/UI Courses by TeachMeSkills (2020)
- Bachelor's Degree in Software Engineering, Polotsk State University (2010-2015)
